

Transfers of securities to The Royal Bank of Scotland plc pursuant to the Dutch Scheme

On 6 February 2010, ABN AMRO Bank N.V. (registered with the Dutch Chamber of Commerce under number 33002587) changed its name to The Royal Bank of Scotland N.V. ("**RBS N.V.**") and on 1 April 2010 ABN AMRO Holding N.V. changed its name to RBS Holdings N.V.

On 26 March 2012, the Boards of The Royal Bank of Scotland Group plc, The Royal Bank of Scotland plc (with its registered office at 36 St Andrew Square, Edinburgh, Scotland) ("**RBS plc**"), RBS Holdings N.V., RBS N.V. and RBS II B.V. announced that (1) RBS N.V. (as the demerging company) and RBS II B.V. (as the acquiring company) had filed a proposal with the Dutch Trade Register for a legal demerger of a substantial part of the business conducted by RBS N.V. in the Netherlands as well as in certain EMEA branches of RBS N.V. by way of a Dutch statutory demerger (the "**Demerger**"), and (2) RBS plc and RBS II B.V. had made filings with Companies House in the UK and the Dutch Trade Register respectively for, following the Demerger, a proposed cross-border merger of RBS II B.V. into RBS plc (the "**Merger**", and together with the Demerger, the "**Dutch Scheme**"). The Demerger took effect at 00:00hrs (Central European Summer Time) on 10 September 2012 and the Merger took effect at 00:01hrs (British Summer Time) on 10 September 2012 (the "**Effective Time**").

From the Effective Time, RBS plc became the issuer of those securities originally issued by RBS N.V. which were transferred to RBS plc pursuant to the Dutch Scheme (unless the securities were exercised, redeemed or repurchased and cancelled prior to the Effective Time). For details of which securities RBS plc has become the issuer of from the Effective Time pursuant to the Dutch Scheme, investors should refer to (I) for securities issued prior to 23 March 2012, http://www.investors.rbs.com/RBS_NV, or (II) for securities issued from on or about 23 March 2012, the issue and/or offer documents (including term sheets) (if such issue and/or offer documents indicate that RBS plc was expected to become the issuer of the securities as a result of the Dutch Scheme, then (subject as set out above) RBS plc has become the issuer).

Under the Dutch Scheme, certain agreements relating to the transferring securities to which RBS N.V. was a party were also transferred to RBS plc (in full or to the extent connected with the relevant transferring securities), on the terms and subject to the exceptions described in the Demerger proposal.

In conjunction with the implementation of the Dutch Scheme, RBS plc has offered certain irrevocable undertakings to holders of the transferred securities, and counterparties to the transferring agreements, pursuant to a Deed of Irrevocable Offer executed by it and dated 25 March 2012 ("**Deed of Irrevocable Offer**"). To view a copy of the Deed of Irrevocable Offer, and for further details of the Dutch Scheme generally (including in relation to the Demerger and Merger proposals), investors and counterparties should refer to http://www.investors.rbs.com/RBS_NV.

In connection with this issue, the Issuer may over-allot or effect transactions which stabilise or maintain the market price of the Certificates at a level which might not otherwise prevail. DOCUMENTS INCORPORATED BY REFERENCE

The Issuer incorporates by reference into this Prospectus (i) the annual reports for the years ended 31 December 1997, 1998 and 1999 and the unaudited interim financial statements for the six months ended 30 June 2000 of ABN AMRO Holding N.V. (each of which incorporates the financial statements of the Issuer) (in English); and (ii) the articles of association of the Issuer.

From the date of this Prospectus, a copy of any or all of the documents which are incorporated herein by reference, will be available free of charge during usual business hours on any day (except Saturdays, Sundays and legal holidays) at the specified office of the Paying Agents and Listing Agent in Luxembourg and at the registered office of the Issuer. Written or telephone requests for such documents should be directed to the Issuer at its registered office set out at the end of this Prospectus. Such documents will also be available upon request at the offices of the Fiscal Agent.

RISK FACTORS

An investment in the Certificates entails significant risks not associated with similar investments in a conventional debt and equity security, including the following:

The Certificates entitle the Certificateholder to receive the Settlement Amount or the Early Termination Amount, as the case may be, from the Issuer. Investors are therefore at risk that the level of the relevant Index may cause the Settlement Amount or the Early Termination Amount to be less than the amount paid for the Certificates. Accordingly, this investment bears the market risk of a direct equity investment and investors are cautioned to take advice accordingly;

There can be no assurance as to how the Certificates will trade in the secondary market or whether such market will be liquid or illiquid. Application has been made to list the Certificates on the Luxembourg Stock Exchange. No assurance can be given that there will be a market for the Certificates. If the Certificates are not traded on any exchange, pricing information for the Certificates may be more difficult to obtain, and the liquidity and market prices of the Certificates may be adversely affected;

The market value for the Certificates will be affected by a number of factors independent of the creditworthiness of the Issuer and the level of the relevant Index, including, but not limited to market interest, exchange rates and yield rates. In addition, the level of the relevant Index depends on a number of interrelated factors, including economic, financial and political events in Europe and elsewhere, including factors affecting capital markets generally and the Relevant Exchanges. The price at which a Certificateholder will be able to sell Certificates prior to exercise may be at a discount, which could be substantial to the value of the Certificates at the Issue Date if, at such time, the level of the relevant Index is below, equal to or not sufficiently above the level of such Index at the date of this Prospectus. The historical levels of the relevant Index should not be taken as an indication of the Index's future performance during the term of the Certificates;

Potential conflicts of interest may exist between the Calculation Agent and Certificateholders, including with respect to certain determinations and judgments that the Calculation Agent may make pursuant to the Conditions that may influence the amount receivable upon redemption of the Certificates;

Prospective investors who consider purchasing the Certificates should be aware that these Certificates are open-end Certificates. This means that settlement of the Certificates depends on the Certificateholder exercising his right to receive the Settlement Amount or the Issuer terminating the Certificates, respectively.

Prospective investors who consider purchasing the Certificates should reach an investment decision only after carefully considering the suitability of the Certificates in light of their particular circumstances.

SUMMARY INFORMATION RELATING TO THE INDICES

ALL INFORMATION CONTAINED IN THIS PROSPECTUS REGARDING THE INDICES HAS BEEN REPRODUCED FROM INFORMATION PUBLISHED BY THE INDEX SPONSORS AND BLOOMBERG. THE ISSUER HAS NOT PARTICIPATED IN THE PREPARATION OF SUCH INFORMATION NOR MADE ANY DUE DILIGENCE INQUIRY WITH RESPECT TO THE INFORMATION PROVIDED THEREIN OR HEREIN AND ASSUMES NO RESPONSIBILITY FOR THE ADEQUACY OR ACCURACY OF SUCH INFORMATION.

INVESTORS IN THE CERTIFICATES ARE URGED TO CONDUCT THEIR OWN INVESTIGATION INTO THE INDICES. THE ISSUER MAKES NO REPRESENTATION THAT SUCH INFORMATION REGARDING THE INDICES IS ACCURATE OR COMPLETE. FURTHERMORE, THERE CAN BE NO ASSURANCE THAT ALL EVENTS OCCURRING PRIOR TO THE DATE OF THIS PROSPECTUS (INCLUDING EVENTS THAT WOULD AFFECT THE ACCURACY OR COMPLETENESS OF SUCH INFORMATION) THAT WOULD AFFECT THE INDEX OR THE SHARES COMPRISED THEREIN (AND THEREFORE THE TRADING PRICE AND EXCHANGE VALUE OF THE CERTIFICATES) HAVE BEEN PUBLICLY DISCLOSED. SUBSEQUENT DISCLOSURE OF ANY SUCH EVENTS OR THE DISCLOSURE OR FAILURE TO DISCLOSE MATERIAL FUTURE EVENTS CONCERNING THE INDICES OR THE SHARES COMPRISED THEREIN COULD AFFECT THE TRADING PRICE AND SETTLEMENT AMOUNT OF THE CERTIFICATES.

SUMMARY INFORMATION RELATING TO THE DOW JONES EURO STOXX 50SM INDEX (the “EURO STOXX 50 Index”)

General Description

The EURO STOXX 50 Index is a capitalisation-weighted index and a subset of 50 companies of the Dow Jones EURO STOXX 50, which only includes companies from countries that are part of the EMU. The purpose of the Dow Jones European indices generally is to provide a definitive standard for measuring stock market performance on a European basis and for the EURO STOXX 50 Index specifically, the purpose is to reflect the sector leaders of the Euro zone.

Calculation

The EURO STOXX 50 Index is calculated in EUR and is calculated on a real-time basis every 15 seconds on such days when at least 50 per cent of the market capitalisation of the Dow Jones STOXX is available from the time the first exchange opens (but in no case earlier than 8.30 a.m. CET) until the last exchange closes. The official closing value of the EURO STOXX 50 Index is calculated using the closing price of each stock that did trade and adjusted closing prices of the previous trading day for those stocks that did not trade on the current day. If there is a stock exchange holiday in one or more countries, the last available stock prices from that exchange and the last available currency rate will be used for the EURO STOXX 50 Index calculation. Responsibility for the calculation and composition of the EURO STOXX 50 Index is undertaken by STOXX Limited.

Maintenance

The composition of the EURO STOXX 50 Index is reviewed quarterly and changes are implemented on the third Friday in March, June, September and December using market data from the end of January, April, July and October as the basis for the review process. In addition there is an ongoing review for changes in the composition of the EURO STOXX 50 Index by reason of extraordinary events such as bankruptcy, mergers and takeovers and change of primary market listing. In these cases, the event is taken into account as soon as it is effective. If it causes a stock to be dropped from the broad indexes, it is not replaced before the next quarterly review. Changes in the constituents and the industry group classification due to the periodic review will be announced at least four weeks prior to the implementation date.

Sponsor

The Index is calculated and announced by STOXX Limited.

License Agreement

The Sponsor has granted to the Issuer the right to use the EURO STOXX 50 Index for these certificates. The certificates are in compliance with the terms and conditions upon which the authorisation to use the EURO STOXX 50 Index was granted by the Sponsor.

SUMMARY INFORMATION RELATING TO THE NASDAQ 100 INDEX® (the "Nasdaq 100 Index")

General Description

The Nasdaq 100 Index is composed of 100 of the largest and most actively traded non-financial companies listed on the Nasdaq 100 National Market tier of the Nasdaq Stock Market.

The Nasdaq 100 Index share weights of the component securities of the Nasdaq 100 Index at any time are based upon the total shares outstanding in each of the 100 index securities and are additionally subject, in certain cases, to rebalancing. Accordingly, each index security's influence on the value of the Nasdaq 100 Index is directly proportional to the value of its Index share weight.

Calculation

The Nasdaq 100 Index is calculated under a "modified capitalisation-weighted" methodology, which is a hybrid between equal weighting and conventional capitalisation weighting. This methodology is expected to: (1) retain in general the economic attributes of capitalisation weighting; (2) promote portfolio weight diversification (thereby limiting domination of the Nasdaq 100 Index by a few large stocks); (3) reduce Nasdaq 100 Index performance distortion by preserving the capitalisation ranking of companies; and (4) reduce market impact on the smallest Nasdaq 100 Index securities from necessary weight rebalancings.

Under the methodology employed, on a quarterly basis coinciding with Nasdaq's quarterly scheduled weight adjustment procedures, the Nasdaq 100 Index securities are categorized as either "Large Stocks" or "Small Stocks" depending on whether their current percentage weights are greater than, or less than or equal to, the average percentage weight in the Nasdaq 100 Index.

A quarterly examination will result in an Nasdaq 100 Index rebalancing if either one or both of the following two weight distribution requirements are not met: (1) the current weight of the single largest market capitalization Nasdaq 100 Index security must be less than or equal to 24.0% and (2) the "collective weight" of those Nasdaq 100 Index Securities whose individual current weights are in excess of 4.5%, when added together, must be less than or equal to 48.0%. In addition, Nasdaq may conduct a special rebalancing if it is determined necessary to maintain the integrity of the Nasdaq 100 Index.

If either one or both of these weight distribution requirements are not met upon quarterly review or Nasdaq determines that a special rebalancing is required, a weight rebalancing will be performed.

Maintenance

The Nasdaq 100 Index securities are evaluated on an annual basis, except under extraordinary circumstances which may result in an interim evaluation. Securities listed on the Nasdaq Stock Market which meet the above eligibility criteria are ranked by market value.

In addition, the securities in the Nasdaq 100 Index are monitored every day by Nasdaq with respect to changes in total shares outstanding arising from secondary offerings, stock repurchases, conversions, or other corporate actions.

Sponsor

The Index is calculated and announced by the Nasdaq Stock Market Inc.

License Agreement

The Sponsor has granted to the Issuer the right to use the Nasdaq 100 Index for these certificates. The certificates are in compliance with the terms and conditions upon which the authorisation to use the Nasdaq 100 Index was granted by the Sponsor.

SUMMARY INFORMATION RELATED TO THE NEMAX[®] 50 (the “NEMAX Index”)

General Description

The NEMAX Index comprises the 50 most liquid Neuer Markt issues. The index portfolio is checked every six months, in line with the procedures for the MDAX (an index which comprises 70 mid-cap issues, which in terms of size rank after the DAX).

Calculation

The NEMAX Index is capital-weighted, whereby the weight of any individual issue is proportionate to its respective share in the overall capitalisation. The shares of all classes of the various index companies that have been admitted to trading at Frankfurt Stock Exchange are applied as weights in the NEMAX Index. In the course of the index calculation process, the aggregate number of shares across all classes is then weighted by the price of the most liquid class.

Maintenance

The index portfolio is reviewed every three months to see whether its composition still appropriately represents the respective market segment. The selection of NEMAX Index component issues is made on the grounds of certain rankings, the primary selection criteria of which are the exchange turnover on Xetra and the Frankfurt floor (within the proceeding 12 months) and the market capitalisation on a certain reporting date (last trading day of each month).

The composition of the index portfolio for the NEMAX Index is generally reviewed every three months. Any replacement of index component issues is carried out in March, June, September and December.

The Working Committee for Equity Indices advises Deutsche Börse AG on all issues related to the NEMAX Index, recommending measures which are necessary in order to ensure the relevance of the index range and the correctness and transparency of the index calculation process. In accordance with the various rules set out in this guideline, the Committee pronounces recommendations in respect of the composition of Deutsche Börse's indices. However, any decision on the composition of and possible modifications to the NEMAX Index are exclusively taken by the Board of Deutsche Börse AG.

Mergers or events of insolvency may trigger an extraordinary change of the corresponding index composition. In addition, certain rules provide for the replacement of component issues even outside those ordinary dates.

SUMMARY INFORMATION RELATED TO THE SMI[®] INDEX (the “SMI Index”)

General Description

The SMI Index is a capital-weighted index, unadjusted for dividends. It comprises the highly liquid shares of up to 25 of the most important large-cap Swiss companies (so-called blue chips), which represent approximately 80% of the total market capitalisation.

Calculation

The market capitalisation is calculated on the basis of the total number of outstanding shares. The SMI Index is published realtime. If a trade is concluded in one or more SMI stocks, the index is recalculated and published via Swiss Market Feed. Only prices of trades concluded on-exchange (i.e. on the SWX Swiss Exchange) are factored into the index calculation. SMI is a registered trademark of the SWX Swiss Exchange. Its use by third parties has been subject to a licensing fee since 1 January 1999. In computing the index, the last-paid price is taken into account. Should no transaction have taken place yet on the day of computation, the previous day's closing price is used. Only prices paid during electronic trading on SWX (i.e. On-Exchange transactions) are taken into account.

Maintenance

The SMI Index is sponsored by the Swiss Exchange which has nominated a group of experts as “Index Commission”. The Swiss Exchange has made arrangements with ECOFIN, Forschungs- und Beratungs-AG, Zurich, and TELEKURS AG, Zurich (technical assistance).

The Index Commission decides upon changes to the Index Rules, the manner in which specific capital events are to be treated, as well as extraordinary changes in the composition of the Index.

When very large changes in the composition of the market occur as the result of capital events such as mergers or new listings, the Index Commission may decide to include an issue in the SMI Index outside of the established acceptance date if they have deemed that the SMI Index inclusion criteria have been clearly met. For the same reason, however, a given issue can be eliminated from the Index if the requirements for continued inclusion in the SMI[®] Index are no longer fulfilled.

SUMMARY INFORMATION RELATED TO THE DOW JONES INDUSTRIAL AVERAGESM INDEX (the “DJIA Index”)

General Description

The companies represented in the DJIA Index are household names and are leaders in their respective industries. Moreover, their stocks are broadly held by both individual and institutional investors. As of December 22, 1999, the DJIA Index' 30 “blue-chip” stocks had a market value of USD4.12 trillion, representing over 25% of the more than USD15 trillion market value of all U.S. stocks.

Calculation

The DJIA Index is unique in that it is price weighted rather than market capitalisation weighted. In essence, the DJIA Index consists of one share of each of its 30 stocks. Thus, DJIA Index component weightings are affected only by changes in the stocks' prices, while other indexes' weightings are affected by price changes *and* changes in shares outstanding.

When initially created, the DJIA Index was a simple average (hence the name), computed by merely adding up the prices of the index's stocks and dividing that sum by the total stock number. However, it eventually became clear that a method was needed to smooth out the effects of stock splits and composition changes to prevent distortions. Thus today a periodically adjusted DJIA Index divisor is used. When divided into the sum of the DJIA Index stock prices, the divisor generates the number that is reported every day in newspapers, on television and radio, and over the Internet. With the incorporation of the divisor, the DJIA Index is not technically an average anymore.

Maintenance

For the sake of continuity, composition changes are rare, and generally have occurred only after corporate acquisitions or other dramatic shifts in a company's core business. When the editors determine that one component stock should be changed, they review all other stocks in the index as well. Thus, when a review is completed, multiple changes are often implemented.

The Index is calculated and announced by Dow Jones & Company, Inc.

SUMMARY INFORMATION RELATED TO THE DAX[®] (the "DAX Index")

General Description

The DAX Index reflects the blue chip segment comprising the largest and most actively traded German companies that are listed at the Frankfurt Stock Exchange (the "FWB"). It comprises 30 issues, which have been admitted to trading in the First and Second segment.

Calculation

The DAX Index is capital-weighted, whereby the weight of any individual issue is proportionate to its respective share in the overall capitalisation. The shares of all classes of the various index companies that have been admitted to trading at FWB are applied as weights in the DAX Index. In the course of the index calculation process, the aggregate number of shares across all classes is then weighted by the price of the most liquid class.

Maintenance

The DAX Index portfolio is reviewed every three months to see whether its composition still appropriately represents the respective market segment. The selection of DAX Index component issues is made on the grounds of certain rankings, the primary selection criteria of which are the exchange turnover on Xetra and the Frankfurt floor (within the preceding 12 months) and the market capitalisation on a certain reporting date (last trading day of each month).

The composition of the index portfolio is generally reviewed for the DAX Index on annual basis. Any replacement of index component issues is carried out on the respective chaining dates in September.

The Working Committee for Equity Indices advises Deutsche Börse AG on all issues related to the DAX Index, recommending measures which are necessary in order to ensure the relevance of the index range and the correctness and transparency of the index calculation process. In accordance with the various rules set out in this guideline, the Committee pronounces recommendations in respect of the composition of Deutsche Börse's indices. However, any decision on the composition of and possible modifications to the DAX Index are exclusively taken by the Board of Deutsche Börse AG.

Mergers or events of insolvency may trigger an extraordinary change of the corresponding index composition.

c) Effect of Exercise Notice

Delivery of a telex or notice as referred to in Condition 6(a) shall constitute an irrevocable election and undertaking by the relevant Certificateholder to exercise the Certificates specified in it. After the delivery of such telex or notice, such exercising Certificateholder may not otherwise transfer such Certificates. Notwithstanding this, if a Certificateholder does so transfer or attempts so to transfer such Certificates, the Certificateholder will be liable to the Issuer for any losses, costs and expenses suffered or incurred by the Issuer including those suffered or incurred as a consequence of it having terminated any related hedging operations in reliance on the relevant telex or notice and subsequently (i) entering into replacement hedging operations in respect of such Certificates or (ii) paying any amount on the subsequent exercise of such Certificates without having entered into any replacement hedging operations.

In such event, the Issuer will pay such additional amounts as shall be necessary in order that the net amounts received by the holders of the Certificates after such withholding or deduction shall equal the amount of the Settlement Amount or the Early Termination Amount, as the case may be, which would otherwise have been receivable in respect of the Certificates, in the absence of such withholding or deduction; except that no such additional amounts shall be payable with respect to any Certificate presented for payment:

- (i) by or on behalf of a Certificateholder who is liable for such taxes or duties in respect of such Certificate by reason of his having some connection with The Netherlands other than the mere holding of such Certificate; or

- (iii) more than 30 days after the Relevant Date (as defined below) except to the extent that the holder thereof would have been entitled to an additional amount on presenting the same for payment on such thirtieth day.

As used herein, the "Relevant Date" means the date on which such payment first becomes due, except that, if the full amount of the moneys payable has not been duly received by the Issuer on or prior to such due date, it means the date on which, the full amount of such moneys having been so received, notice to that effect is duly given to the Certificateholders in accordance with Condition 16.

10. Market Disruption

(a) Rights on a Market Disruption Event

If, in the opinion of the Calculation Agent, a Market Disruption Event has occurred and is continuing on the Valuation Date, then the Valuation Date shall be the first succeeding Exchange Business Day on which there is no Market Disruption Event, unless there is a Market Disruption Event on each of the two Exchange Business Days immediately following the original date that, but for the Market Disruption Event, would have been the Valuation Date. In that case, (i) that second Exchange Business Day shall be deemed to be the Valuation Date notwithstanding the Market Disruption Event, and (ii) the Calculation Agent shall determine the official closing level of the Index on that second Exchange Business Day determined in accordance with the formula for and method of calculating the Index last in effect prior to the commencement of the Market Disruption Event using the exchange traded price (or, if trading in the relevant security has been materially suspended or materially limited, its good faith estimate of the

exchange traded price that would have prevailed but for the suspension or limitation) as of the Valuation Time on that second Exchange Business Day of each security comprised in the Index.

(b) Rights on a Market Disruption Event on Averaging Dates

Condition 11(a) applies *mutatis mutandis* to the Early Termination Date and each Averaging Date, save that if the first Averaging Date would be postponed to a day that already is an Averaging Date, the first Averaging Date shall be the first succeeding Exchange Business Day on which there is no Market Disruption Event and which is not also an Averaging Date.

(c) Meaning of "Market Disruption Event"

"Market Disruption Event" means the occurrence or existence on any Exchange Business Day during the one-half hour period that ends at the Valuation Time of any suspension of or limitation imposed on trading (by reason of movements in price exceeding limits permitted by a Relevant Exchange or otherwise), (a) on a Relevant Exchange in securities that comprise 20 per cent or more of the level of the relevant Index or (b) in options contracts or futures contracts on the Index on any Related Exchange.

For the purpose of determining whether a Market Disruption Event exists at any time, if trading in a security included in the Index is materially suspended or materially limited at that time, then the relevant percentage contribution of that security to the level of the Index shall be based on a comparison of (x) the portion of the level of the Index attributable to that security relative to (y) the overall level of the Index, in each case immediately before that suspension or limitation.

The Calculation Agent shall as soon as reasonably practicable under the circumstances notify the Issuer (if not also the Calculation Agent) and the Clearing Systems of the existence or occurrence of a Market Disruption Event on any day that but for the occurrence or existence of a Market Disruption Event would have been the Valuation Date, the Early Termination Date or an Averaging Day, as the case may be.

11. Adjustments

(a) General Adjustment Events

- (i) If the Index is not calculated and announced by the sponsor but is calculated and announced by a successor sponsor acceptable to the Calculation Agent; or if the Index is replaced by a successor index using, in the determination of the Calculation Agent, the same or a substantially similar formula for and method of calculation as used in the calculation of the Index, then that index or the index announced by a successor sponsor, as the case may be, will be deemed to be the Index.
- (ii) If on or prior to the Valuation Date, the Early Termination Date or the Averaging Dates, the relevant Index sponsor (1) makes a material change in the formula for or method of calculating the Index or in any other way materially modifies the Index (other than a modification prescribed in that formula or method to maintain the Index in the event of changes in constituent stock and capitalisation and other routine events); (2) fails to calculate and announce the Index or (3) ceases to calculate the Index, the Calculation Agent may elect (a) that such Index will be replaced by an index that is in the opinion of the Calculation Agent substantially similar to the Index; (b) to calculate the relevant official closing price of the Index, using in lieu of a published level for the Index, the level for the Index as at the Valuation Date, the Early Termination Date or an Averaging Date, as the case may be, as determined by the Calculation Agent in accordance with the formula for and method of calculating the Index last in effect prior to that change or failure, but using only those securities that comprise the Index immediately prior to that change or failure (not including those securities that have since ceased to be listed on any Relevant Exchange); or (c) in the case of a material modification of the Index only, to deem such modified Index to be the Index so calculated and announced.

(b) Other Adjustments

The Issuer reserves the right to make adjustments or to distribute to the Certificateholders any rights in connection with the Certificates as it reasonably believes are appropriate in circumstances where an event or events occur which the Issuer (in its absolute discretion and notwithstanding any adjustments previously made to the Certificates) believes should in the context of the issue of Certificates and its obligations hereunder, give rise to such adjustment or distribution, provided that such adjustment is considered by the Calculation Agent to be appropriate generally (without considering the individual circumstances of any Securityholder or the tax or other consequences of such adjustment in any particular jurisdiction) or is required to take account of provisions of the laws of the relevant jurisdiction or the practices of the Relevant Exchange.

(c) *Notice of Adjustments*

The Calculation Agent shall give notice to Certificateholders of any adjustment in accordance with Condition 16. All calculations and adjustments made by the Calculation Agent are definitive and binding on the Certificateholders, except in the case of manifest error. The Issuer cannot be held liable for any errors, mistakes or omissions in the calculation, distribution and publication of the Index or in the level of the Index.

12. Prescription

The Certificates will become void unless presented for payment within a period of five years after the Relevant Date (as defined in Condition 9) therefor.

13. Events of Default

If any one or more of the following events (each an “Event of Default”) shall have occurred and be continuing:

- (i) default is made for more than 30 days in the payment of the Settlement Amount or Early Termination Amount in respect of the Certificates; or
- (ii) the Issuer fails to perform or observe any of its other obligations under the Certificates and such failure has continued for the period of 60 days next following the service on the Issuer of notice requiring the same to be remedied; or
- (iii) the Issuer is declared bankrupt, or a declaration in respect of the Issuer is made under Chapter X of the Act on the Supervision of the Credit System (*Wet toezicht kredietwezen 1992*) of The Netherlands; or
- (iv) an order is made or an effective resolution is passed for the winding up or liquidation of the Issuer unless this is done in connection with a merger, consolidation or other form of combination with another company and such company assumes all obligations contracted by the Issuer in connection with the Certificates,

then any Certificateholder may, by written notice to the Issuer at the specified office of any of the Paying Agents, effective upon the date of receipt thereof by such Paying Agent, declare the Certificate held by the holder to be forthwith due and payable whereupon the same shall become forthwith due and payable at its fair market value together with accrued interest (if any) to the date of repayment, without presentment, demand, protest or other notice of any kind.

14. Purchase by Issuer

The Issuer or any of its subsidiaries may at any time purchase Certificates at any price in the open market or by tender or private treaty. Any Certificates so purchased may be held, resold or cancelled.

15. Agents

(a) *Paying Agents*

The Issuer is entitled to vary or terminate the appointment of any Paying Agent and/or appoint additional or other Paying Agents and/or approve any change in the specified office through which any Paying Agent or exchange agent acts, provided that:

- (i) so long as the Certificates are listed on any stock exchange, there will at all times be a Paying Agent with a specified office in such place as may be required by the rules and regulations of the relevant stock exchange; and
- (ii) there will at all times be a Fiscal Agent which shall act as principal paying agent, paying and exchange agent in relation to the Certificates.

Any variation, termination, appointment or change shall only take effect (other than in the case of insolvency, when it shall be of immediate effect) after not less than 30 nor more than 45 days’ prior notice thereof shall have been given to the Certificateholders in accordance with Condition 16.

(b) *Calculation Agent*

The Issuer reserves the right to vary or terminate the appointment of the Calculation Agent provided that it shall at all times maintain a Calculation Agent. The Calculation Agent (whether it be the Issuer or a third party), acts solely as agent of the Issuer and does not assume any obligation or duty to, or any relationship of agency or trust for or with, the Certificateholders. All calculations and determinations in respect of the Certificates made by the Calculation

Agent shall (save in the case of manifest error) be final, conclusive and binding on the Issuer and the Certificateholders.

And it also has a substantial presence in Brazil where it acquired Banco Real, the fourth largest privately held bank in the country in November 1998. During 1999, ABN AMRO also established a presence in Italy.

ABN AMRO’s performance reflects the group’s broad diversification of revenue sources and risks on the basis of geography and products, its leading position in its home markets and a cautious management approach that focuses on shareholder value, profitability and cost control.

ABN AMRO’s strategy is to use its strong capital base to pursue both organic growth and expansion through acquisitions with the goal of enhancing its position in key regions, broadening the range of products and services offered and entering new markets that it believes have significant long-term growth and profitability potential without risking its ability to achieve its targets for financial performance.
