Governing law - The Securities are governed by French law.

Unless previously redeemed or purchased and cancelled, each Security entitles its holder to receive from the Issuer on the Redemption Date a Cash Settlement Amount:

Constant Leverage: open ended products which have a return calculated by reference to a fixed daily leverage on the positive or negative performance of the Underlying Reference(s). There is no capital protection.

Introduction

In respect of (i) Bull Certificates the performance of the Bull Certificate over one day will be equal to the leveraged performance of the relevant Underlying Reference over that same day (which may be positive or negative) and in respect of (ii) Bear Certificates, the leveraged performance of the relevant Underlying Reference over one day (which may be positive or negative) will have the inverse effect on the performance of the Bear Certificate over that same day.

Financing Amount and Reset Threshold

In each case, the performance of the Bull Certificate or the Bear Certificate (as the case may be) will be adjusted by the applicable Financing Component. The Financing Component represents the cost of borrowing money to create leverage, the cost of hedging the Securities and the fee and therefore has an impact on the value of the Certificates.

Because the performance of the Certificates over any period longer than one day will be derived from the compounded daily performance of the Underlying Reference during that period, such Certificate's performance may differ significantly from the Leverage Factor times the overall performance of the Underlying Reference over that same period.

Bull Certificates and Bear Certificates include a feature, the Reset Threshold, which is a fixed percentage applied to the value of the Underlying Reference ascertained at the preceding Calculation Time. Should the last traded price of the Underlying Reference breach the Reset Threshold at any time, a Reset Event will be deemed to have occurred. The Reset Threshold will be reset intraday and will from then on be based on the Reset Price until the next Reset Event or the next Calculation Time whichever comes first.

Issuer Call Option and Holder Put Option

The Issuer may decide to early redeem the Bull Certificates or Bear Certificates (as the case may be) subject to prior written notice to the Holders of Securities. Holders of Securities may also terminate their position in the Certificates by exercising the Holder Put Option upon given written notice to the Issuer.

Final Payout

The Holders of Securities will receive a Payout (ETS Final Payout 2300) equal to the Bull Cash Value (in case of Bull Certificates) or Bear Cash Value (in case of Bear Certificates) on the relevant Valuation Date, in each case, converted into the currency of the Securities at the exchange rate on the relevant Valuation Date.

Fluctuations in the exchange rate of the relevant currency will also affect the value of the Certificates.

"Bear Cash Value" or "Bear CV_t" means, in respect of a Relevant Business Day, an amount calculated by the Calculation Agent in accordance with the following formula:

$$\max [Bear CV_{t-1} \times (1 - L \times (\frac{U_t + div_t^{gross}}{U_{t-1}} - 1)) + FC_t; 0.5\% \times Bear CV_{t-1}] ;$$

"Bull Cash Value" or "Bull CV_t" means, in respect of a Relevant Business Day, an amount calculated by the Calculation Agent in accordance with the following formula:

$$\max [Bull CV_{t-1} \times (1 + L \times (\frac{U_t + div_t^{net}}{U_{t-1}} - 1)) + FC_t; 0.5\% \times Bull CV_{t-1}] ;$$

"Valuation Date" means, the earlier to occur of:

- in case of Issuer Call Option, the relevant Optional Redemption Valuation Date.

If in the determination of the Calculation Agent the Observation Price of the Underlying Reference at one or more time(s) (each such time a **"Reset Event Determination Time"**) during any Observation Time Period is (i) equal to or greater than the Reset Threshold (in the case of Bear Certificates) or (ii) equal to or less than the Reset Threshold (in the case of Bull Certificates) (each a **"Reset Event"**), the Calculation Agent will on each occasion calculate the Reset Price and the Adjusted Bull CV or the Adjusted Bear CV, as the case may be, shall be the Bull Cash Value or the Bear Cash Value, as the case may be, for such Reset Event Determination Time on such Underlying Business Day.

Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.
2. The BNP Paribas Group's risk management policies, procedures and methods may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
5. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.
6. Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact the BNP Paribas Group and the financial and economic environment in which it operates.
7. Should the BNP Paribas Group fail to implement its strategic objectives or to achieve its published financial objectives, or should its results not follow stated expected trends, the trading price of its securities could be adversely affected.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Certificates, including:

1. Risk relating to the structure of the Certificates:

Constant Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the daily performance of the Underlying Reference(s) and the operation of an automatic early redemption feature. Constant Leverage Products are generally suited to short term investments intraday or over a few days. Investments held for a longer period of time may be affected by volatile market conditions which may have a negative impact on the performance of the Underlying Reference(s). Bull and Bear Certificates (ETS payout 2300) are designed for short term or intraday trading only because they are valued on the basis of their compounded daily performance;

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Certificates:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the

Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Toepasselijk recht - Op de Schuldeffecten is Frans recht van toepassing.

Interest - De Schuldeffecten leveren geen interest op.

Onderliggende - Index.

Aflossing - De Schuldeffecten zijn contant vereffende Schuldeffecten.

Tenzij een Schuldeffect op een vroeger tijdstip werd afgelost of ingekocht en geannuleerd, geeft elk Schuldeffect te houder ervan het recht om van de Emittent op de Aflossingsdatum een Contant Vereffeningbedrag te ontvangen dat gelijk is aan:

Constance Leverage: producten zonder een aflooptdatum met een opbrengst die berekend wordt door te verwijzen naar een vaste dagelijkse leverage op de positieve en negatieve prestaties van de Onderliggende Referentie. Er is geen kapitaalbescherming.

Inleiding

Met betrekking tot (i) Bull Certificaten zijn de prestaties van Bull Certificaten gedurende één dag gelijk aan de prestatie met leverage van de relevante Onderliggende Referentie over diezelfde dag (die positief of negatief kan zijn) en voor (ii) Bear Certificaten, zullen de prestaties van de relevante Onderliggende Referentie gedurende één dag (die positief of negatief kunnen zijn) het omgekeerde effect hebben op de prestaties van het Bear Certificaat gedurende diezelfde dag.

Financieringsbedrag en Resetdrempel

In elk geval worden de prestaties van het Bull Certificaat of het Bear-certificaat (naar gelang van het geval) aangepast door de toepasselijke Financierende component. De Financierende component vertegenwoordigt de kosten van het lenen van geld om de leverage te creëren, de kosten van het afdekken van de Securities de vergoeding en heeft dus een impact op de waarde van de Certificaten.

Omdat de prestaties van de Certificaten over een periode langer dan één dag zullen worden afgeleid van de gecombineerde dagelijkse prestaties van de Onderliggende Referentie gedurende die periode, kunnen de prestaties van dergelijke Certificaten aanzienlijk verschillen van de Leverage-factor keer de globale prestatie van de Onderliggende Referentie over diezelfde periode.

Bull Certificaten en Bear Certificaten omvatten een kenmerk, de Resetdrempel, dat een vast percentage is dat wordt toegepast op de waarde van de Onderliggende Referentie die op de voorgaande Rekestijd is vastgesteld. Indien de laatst verhandelde koers van de Onderliggende Referentie de Reset drempel op enig moment gelijk is aan of overschrijdt, wordt ervan uitgegaan dat er zich een Resetevenement heeft voorgedaan. De Resetdrempel zal intraday worden gereset en zal vanaf dan gebaseerd worden op de Reset prijs tot de volgende Resetevenement of de volgende Rekestijd, afhankelijk van wat zich het eerst voordoet.

Call-optie Emittent en put-optie houder

De Emittent kan beslissen om de Bull Certificaten of Bear Certificaten (naar gelang van het geval) vervroegd terug te betalen met inachtneming van de voorafgaande schriftelijke kennisgeving aan de Houders van Securities. Houders van Securities kunnen ook hun positie in de Certificaten beëindigen door de putoptie uit te oefenen op basis van een schriftelijke kennisgeving aan de Emittent.

Finale Uitbetaling

De Houders van Securities ontvangen een Payout (ETS Final Payout 2300) die gelijk is aan de waarde van het Bull Certificaat (in geval van Bull Certificaten) of Bear Certificaat (in geval van Bear Certificaten) op de betreffende Waarderingsdatum, in elk geval omgerekend in de valuta van de Securities tegen de wisselkoers op de betreffende Waarderingsdatum.

Schommelingen in de wisselkoers van de betreffende valuta zullen ook de waarde van de Certificaten beïnvloeden.

Meest materiële risicofactoren eigen aan de garant

1. Een substantiële toename van nieuwe provisies of een leemte in het niveau van eerder geboekte provisies, blootgesteld aan kredietrisico en tegenpartijrisico, kan van negatieve invloed zijn op de resultaten van operaties en de financiële situatie van BNP Paribas Groep.
2. Het beleid, de procedures en de methoden voor risicobeheer van de BNP Paribas Groep kunnen ertoe leiden dat de Groep wordt blootgesteld aan niet-geïdentificeerde of niet-voorzien risico's, wat kan leiden tot aanzienlijke verliezen.
3. BNP Paribas Groep kan significante verliezen lijden op haar handels- en investeringsactiviteiten als gevolg van marktfluctuaties en volatiliteit.
4. De toegang van BNP Paribas Groep tot financiering en financieringskosten kunnen negatief beïnvloed worden door een herhaling van financiële crises, die op haar beurt de economische omstandigheden verslechteren, en verdere ratingverlagingen, toenames in kredietrisico's of andere factoren teweeg kunnen brengen.

5. Ongunstige economische en financiële omstandigheden hebben in het verleden impact gehad op BNP Paribas Groep en de markten waarin zij opereert, en dit kan zich opnieuw voordoen.

6. Wetten en richtlijnen die in de afgelopen jaren zijn aangenomen, voornamelijk als antwoord op de wereldwijde financiële crisis, alsmede nieuwe wetsvoorstellen, kunnen een significante materiële impact hebben op BNP Paribas Groep en de financiële en economische omgeving waarin zij actief is.

7. Als de BNP Paribas Groep er niet in slaagt haar strategische doelstellingen te implementeren of haar gepubliceerde financiële doelstellingen te behalen, of als haar resultaten niet de verwachte verklaarde trends volgen, kan dit een negatieve invloed hebben op de handelsprijs van haar effecten.

Wat zijn de voornaamste risico's specifiek voor de effecten?

Meest materiële risicofactoren die specifiek zijn voor de effecten

Ook aan de Certificaten zijn risico's verbonden, waaronder:

1. Risico met betrekking tot de structuur van de Effecten:

Constance leverageproducten: Beleggers kunnen blootgesteld worden aan gedeeltelijk of volledig verlies van hun belegging. De opbrengst van Schuldeffecten hangt af van de dagelijkse prestaties van de Onderliggende Referentie(s) en de uitvoering van een automatische vroegtijdige aflossing kenmerk. Constance leverageproducten zijn over het algemeen geschikt voor kortetermijnbeleggingen intraday of van een paar dagen. Beleggingen voor een langere periode kan beïnvloed worden door volatiele marktomstandigheden die een negatieve impact kunnen hebben op de prestaties van de Underlying Reference(s). [Bull and Bear] (Factor Short en Factor Long) (ETS Payout 2300) zijn ontwikkeld voor alleen kortetermijnhandel omdat zij gewaardeerd worden op basis van hun samengestelde, dagelijkse prestaties.

2. Risico met betrekking tot de Onderliggende referentie en haar Disruptie en Correcties:

Index Trackers zijn verbonden aan de prestaties van een onderliggende index (een "Index"), die kan bestaan uit verschillende financiële activa, zoals obligaties, aandelen, valutakoersen, of onroerendgoedprijzen, of kunnen betrekking hebben op een mix van vermogenscategorieën. Beleggers in Index Trackers worden geconfronteerd met de risico's van een uitgebreidere reeks omstandigheden, dit betekent dat de onderliggende activa van de Index niet presteren zoals verwacht, vergeleken met een investering in conventionele schuldbrieven. Dientengevolge is het aannemelijker dat het rendement van een belegging in Index Trackers ongunstig wordt beïnvloed dan een investering in conventionele schuldbrieven: blootstelling aan een of meer indices, aanpassingsgebeurtenissen en verstoring van de markt of het niet opengaan van een beurs, hetgeen van nadelige invloed kan zijn op de waarde en liquiditeit van de Effecten en dat de Emittent geen informatie na uitgifte ten aanzien van de Onderliggende Referentiewaarde verstrekt.

3. Risico's met betrekking tot de handelsmarkten van de Effecten:

Factoren die van invloed zijn op de waarde en beurskoers van Effecten: De beurswaarde van de Effecten kan door diverse factoren worden beïnvloed, waaronder de betrokken prijs, de waarde of het niveau van de Onderliggende Referentie(s), de resterende looptijd tot aan de afgesproken aflossingsdatum van de Effecten, de huidige of geïmpliceerde volatilititeit behorend bij de Onderliggende Referentie(s), en het correlatiecoëfficiënt van de betrokken Onderliggende Referentie(s). De kans dat de waarde en de beurskoers van de Effecten zullen fluctueren (ofwel positief, ofwel negatief), is afhankelijk van een aantal factoren, die beleggers zorgvuldig moeten afwegen alvorens over te gaan op de aankoop of verkoop van Effecten.

4. Juridische risico's:

Vergaderingen - De voorwaarden van de Schuldeffecten zullen bepalingen bevatten voor het oproepen van vergaderingen van houders van dergelijke Schuldeffecten om te beraadslagen over aangelegenheden in hun algemeen belang. Krachtens deze bepalingen kunnen bepaalde omschreven meerderheidsbesluiten bindend zijn voor alle houders, met inbegrip van de houders die de relevante vergadering niet bijwoonden of daar geen stem uitbrachten en houders die een van de meerderheid afwijkende stem hebben uitgebracht.
